

SLIP - Structured Leveraged Investment Product

(Structured Leveraged Investment Product)

SLIP is a modern structured investment solution that provides private investors with access to the largest global companies' stocks and key cryptocurrencies.

Key parameters

Assets

Leading company stocks (Nvidia, Tesla, Microsoft, Apple, Facebook, Google, Oracle, Disney, Netflix, etc.), metals (Gold, Silver), cryptocurrencies, and futures.

Investment period

The user may select any period within the range:

- **Minimum period:** 1 day
- **Maximum period:** 180 days

The user independently determines the preferred investment period within these limits.

Minimum amount

The starting threshold is determined by regional regulations, with no upper limits for large investments.

Leverage

The maximum available leverage in the market is used to enhance profitability.

- **For trades up to 7 days** — 1:500
- **For trades from 8 to 30 days** — 1:200
- **For trades over 30 days** — 1:100

Withdrawal and reinvestment conditions

- The principal investment amount can be withdrawn at any time without restrictions.
- In case of a loss, the investment amount is reduced by the loss amount, but there is an option to compensate for the loss by attracting referrals into the SLIP product: for every \$1 of compensation, \$4 in referrals' investments must be attracted.
- Profit from the transaction can be withdrawn or reinvested, provided that for every \$4 of referral investment, \$1 of profit can be withdrawn or reinvested.

Example:

With a leverage of 1:500 and a 2% asset growth, the return will be $2\% \times 500 = 1000\%$.

SLIP trade examples

Example SLIP Trade 1

A 7-day trade in Nvidia stock for \$1,000

Stock increase: 3%

Return with 1:500 leverage: $3\% \times 500 = 1500\%$

Profit: $\$1,000 \times 1500\% = \$15,000$

Withdrawal/Reinvestment conditions:

- The principal amount of \$1,000 may be withdrawn without restrictions.
- Profit may be withdrawn or reinvested at the rate of \$1 for every \$4 invested by attracted referrals, with a total limit of \$15,000.

Sums may be withdrawn in portions as referrals are added.

Example SLIP Trade 2

A 30-day trade in Apple stock for \$1,000

Stock increase: 5%

Return with 1:200 leverage: $5\% \times 200 = 1000\%$

Profit: $\$1,000 \times 1000\% = \$10,000$

Withdrawal/Reinvestment conditions:

- The principal amount of \$1,000 may be withdrawn without restrictions.
- Profit may be withdrawn or reinvested at the rate of \$1 for every \$4 invested by attracted referrals, with a total limit of \$15,000.

Sums may be withdrawn in portions as referrals are added.

Profitability table for a \$1,000 investment using 1:500 leverage

Investment amount	Price change (%)	Leverage	Profitability (%)	Compensation amount	Profit	Referrals' investment for compensation	Referrals' investment for profit withdrawal
1,000\$	-10	1:500	0%	1,000\$	0\$	4,000\$	0\$
1,000\$	-5	1:500	0%	1,000\$	0\$	4,000\$	0\$
1,000\$	-2	1:500	0%	1,000\$	0\$	4,000\$	0\$
1,000\$	0	1:500	0%	0\$	0\$	0\$	0\$
1,000\$	1	1:500	500%	0\$	5,000\$	0\$	20,000\$
1,000\$	3	1:500	1,500%	0\$	15,000\$	0\$	60,000\$
1,000\$	5	1:500	2,500%	0\$	25,000\$	0\$	100,000\$
1,000\$	7	1:500	3,500%	0\$	35,000\$	0\$	140,000\$
1,000\$	10	1:500	5,000%	0\$	50,000\$	0\$	200,000\$

(*) Profitability is indicated taking into account full loss compensation via the referral attraction system.
